GET@ Redington | Ex-SDE Intern @ Bosch | MTech Integrated @VIT, Vellore
Bengaluru, Karnataka, India

Summary

Enthusiastic about transforming ideas into reality with code! I'm an Integrated M.Tech (CSE) student at VIT Vellore, driven by a passion for cutting-edge technologies like Machine Learning, IoT, and Web Development.

With expertise in programming languages such as Java, Python, and C, I've dived deep into various tech domains. One of my standout projects, "Kidney CT Disease Detection," involves the use of Deep Learning Models to accurately detect kidney diseases from CT images. I've also designed a "Firefighting Robot" leveraging IoT, which autonomously detects and extinguishes flames, demonstrating my hands-on skills with Arduino and sensors. Another exciting project, "Smart Cloak Room," showcases my proficiency in Web Development by creating a secure, user-friendly luggage storage locker system.

To back my practical skills, I hold several certifications, including Microsoft's Security, Compliance, and Identity Fundamentals and a comprehensive Tableau course from Udemy. Plus, I honed my front-end skills through the University of Michigan's course on HTML, CSS, and JavaScript.

My journey in tech is complemented by some notable achievements like securing 1st place in the Lingua-Fiesta Competition at VIT. Language is another area where I excel, with proficiency in English, native knowledge of Hindi, and elementary skills in French.

I am always eager to connect with like-minded professionals and explore collaborative opportunities. Feel free to reach out or check out my projects!

Experience

Redington Limited
Graduate Engineering Trainee
July 2025 - Present (11 months)
Bengaluru, Karnataka, India

Bosch Global Software Technologies
Software Engineer Intern
September 2024 - June 2025 (10 months)
Bengaluru, Karnataka, India

Education

Vellore Institute of Technology
MTech Integrated, Computer Science · (September 2020 - July 2025)

Ram-Eesh International School - India
· (April 2007 - March 2020)
